Product Attributes

- Weight: 19 lbs
- Material: Copolymer Polypropylene Resin
- Enforcer Mounting System: Franzen Security Products, Inc. offers optional mounting systems for all Enforcer cases. Four custom brackets mount both on the inside of the case, with mounting brackets for the utility vehicle,

luxury boat, or home. These steel brackets are mounted together with steel shafted thumbscrews secured on the inside of the case for high security. The case can be released quickly and ready for transportation

- FAA Requirements: The Enforcer cases meet the- FAA requirements for commercial airlines. Their requirements include: a solid case that can be stowed in underneath storage, a handled case for carrying, and a locking system on the case for security. The firearm has to be unloaded and the storage container must have a security lock system, be crushproof, and can travel as checked baggage.
